***Election/Restrictions***

1. A telephone call was made to Michael Brooks on 04/07/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28 are drawn to bridge or gateway between networks, classified in class 370, subclass 401.
- II. Claims 29-37 are drawn to processing of address header for routing classified in class 370, subclass 392.

The inventions are distinct, each from the other because: Claims 1-28 are Group I. In Group 1, the applicant claims the temporarily disabling one or more switching modules. Claims 29-37 are Group II. In Group II, the applicant claims an access controller, switch controller, fabric controller and the discarding the packet if both the source and destination address are found.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew W Wahba whose telephone number is (703) 305-4684. The examiner can normally be reached on M-F 8:30-5:30.
